CLIENT DELIVERY & RESOURCE TRACKER

Business Feature Guide

A clear, visual walkthrough of what CDT does, who uses it, and the happy path from employee placement through leave, timesheets, engagement health, and invoicing.

AUDIENCE
Delivery leads, account leads, operations, non-technical stakeholders

PRODUCT PROMISE
Shared web SoR that replaces the delivery Excel workbook

ROLES
Admin · Delivery Owner · Account Owner

CORE LOOP
Employees → Leave → Timesheet → Review → Invoice → Dashboard

1. Roles at a glance

You only see screens and actions your role allows. If something is missing, ask an Admin.

ADMIN

System Admin

Users, lookups, import, audit, and full domain access. Opens the month cleanly for the team.

DELIVERY_OWNER

Delivery Owner

Employees & clients, timesheet entry, delivery reviews, generate invoices, dashboard chase-downs.

ACCOUNT_OWNER

Account Owner

Approvals inbox for leave & timesheets; invoice review lifecycle; commercial bench feedback.

WHO OWNS WHICH STAGE

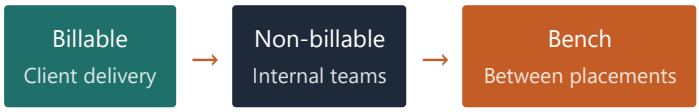

Demo: admin@sst.local · dm@brickred.local · am@brickred.local

Email (typical seed)	Role
admin@sst.local	Admin
dm@brickred.local	Delivery Owner
am@brickred.local	Account Owner

2. Common concepts

3	2	5
EMPLOYEE CATEGORIES	COST CENTERS	PUBLIC ID PREFIXES

EMPLOYEE CATEGORIES

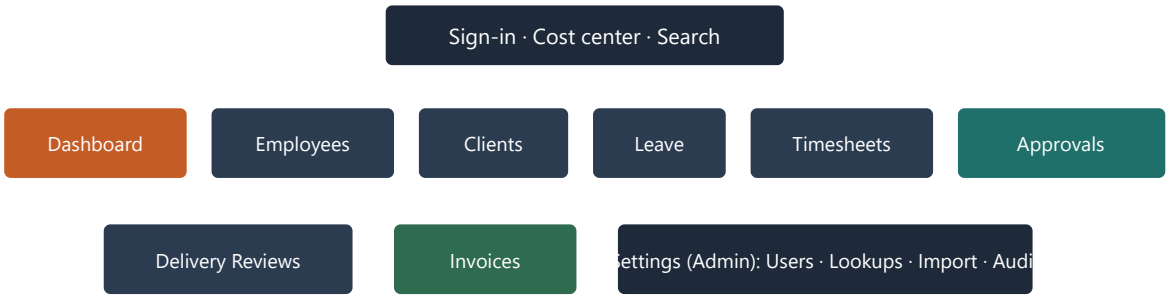

Timesheets, delivery reviews, and invoices apply to **billable Active** employees only.

Concept	Plain meaning
Employee	Any person tracked in CDT. IDs look like CD-00001.
Billable	Placed at a client; can have timesheets, reviews, invoices.
Non-billable	Internal roles (HR, Finance, Leadership, Delivery staff, etc.).
Bench	Between placements; track interviews and manager feedback.
Active / Released	Currently engaged vs rolled off (history is kept).
Cost center	Filter BrickRed or Agyom so KPIs match that unit.
Approved leave only	Pending/rejected leave does not reduce timesheet days.
Public IDs	CD- employee · LV- leave · TSH- timesheet · DEL- review · INV- invoice.

3. Feature catalog

APPLICATION MAP

3.1 Sign-in

Purpose: Secure access with your company account.

How to use: Open the CDT URL → email + password → Sign in. Contact Admin if locked out.

3.2 Cost center filter & search

Purpose: Focus on BrickRed, Agyom, or everything; find people or clients quickly.

How to use: Header Cost Center dropdown + search box. Filters carry into Dashboard and lists.

3.3 Dashboard

Purpose: Portfolio health—headcount, bench, engagement risk, leave today, timesheet gaps, billing.

1. Open Dashboard.
2. Optionally set Delivery Owner, Account Owner, Client, Health, Month.
3. Click KPI cards for underlying detail.

Note: On Leave Today always means *today*, even if Month is set elsewhere.

3.4 Employees

Purpose: Single source of truth for every person CDT tracks.

Category	Purpose	Typical fields
Billable	Client delivery	Client, role, billing, managers
Non-billable	Internal org	Team, support function

Category	Purpose	Typical fields
Bench	Awaiting placement	Bench start, interviews scheduled/cleared, feedback

Create: Employees → New → category → save → gets CD-#####.

Bench feedback: Open bench employee → review interviews → add Delivery Manager / Account Manager feedback.

Release: Active billable → Release → end date/reason → leaves Active counts; history remains.

3. Feature catalog (continued)

3.5 Clients

Purpose: Master list of client accounts, cost center, and ownership.

How to use: Clients → create/edit → assign Delivery and Account Owners.

3.6 Leave

Purpose: Record planned absence for presence & timesheets.

Pending → Approved or Rejected

1. Leave → New → employee, type, dates, reason → Save (Pending).
2. Account Owner approves on Approvals.

3.7 Timesheets

Purpose: Monthly work delivery for billable Active employees.

1. Timesheets → New → employee + month.
2. Enter working days / days worked (leave from Approved leave).
3. Save Pending → Account Owner approves.

One timesheet per employee per month. Approving may create a draft invoice.

3.8 Approvals

Purpose: Account Owner inbox for pending leave and timesheets.

How to use: Approvals → Leave or Timesheet tab → Approve or Reject.

3.9 Delivery reviews

Purpose: Monthly engagement health & client feedback.

On Track · At Risk · Escalated*

*Escalated needs notes. Feedback: Good · Average · Poor.

3.10 Invoices

Purpose: Turn approved timesheets into a billing workflow.

Pending → Approved → Sent → Paid

Alternate path: Rejected with reason. Amounts follow hourly or fixed billing.

3.11 Settings (Admin)

Screen	Purpose
Users	Create/disable accounts & roles
Lookups	Dropdown lists
Import	Bulk load (dry-run → commit)
Audit	Who changed what

4. Full happy paths by role

4.1 Admin — open the month cleanly

1. Sign in as Admin.
2. Settings → Users: confirm Delivery Owner and Account Owner are active.
3. Clients: cost centers and owners are correct.
4. Lookups: leave types and release reasons exist.
5. Optional Import: dry-run → commit.
6. Spot-check Dashboard and Audit after large imports.
7. Hand off to Delivery Owner for day-to-day work.

4.2 Delivery Owner — placement to invoice draft

1. Sign in; set cost center if needed.
2. Employees → New (Billable) with client and billing.
3. Bench people as needed; set interviews; add Delivery Manager feedback.
4. Record Leave when away.
5. Enter monthly Timesheet as Pending.
6. After timesheet approval, generate Invoice if not auto-created.
7. Write monthly Delivery Review.
8. Use Dashboard for missing TS, at-risk, and bench aging.

4.3 Account Owner — approvals and collections

1. Sign in → Approvals.
2. Clear Leave queue (approve or reject with reason).
3. Clear Timesheet queue when days look right.
4. Invoices: Pending review → Approved → Sent → Paid.
5. Reject mismatches with clear reasons.
6. Dashboard for outstanding/overdue and at-risk clients.
7. Add Account Manager Feedback on commercial bench cases.

4.4 End-to-end happy path

All roles working together on one placement month.

SHARED DELIVERY LOOP

5. What CDT does not do yet

Not in shipped MVP

- Automatic emails / Slack notifications
- Live sync from SST
- Half-day leave or holiday calendars
- Single Sign-On (SSO)

What is shipped today

Day-to-day delivery control: employees, leave, timesheets, approvals, engagement health, invoicing, dashboard, admin settings.
